Embroidered badge with sublimation

Technical data sheet

Submit your design

You can submit your design in .png, .jpeg, .pdf, .psd or .ai.`
If you created your design in a drawing program such as Photoshop or
Illustrator, it is useful to include the work file.

Kleuren

'The sky is the limit'! With a sublimation embroidered badge, you can use an
unlimited number of colours, as well as a gradient or gradient effect.
It is even possible to use a photo,
which will be displayed just as photo-realistically on your badge.

Some tips:

- The design or photo should not be too dark. If necessary,
  edit your photo by increasing the brightness.
- Make sure there is sufficient contrast,
  especially between the background and the text.
  For example, a red background with black text is not recommended.

For a sublimation embroidered badge, we cannot use glow-in-the-dark thread or shiny metal
thread.

The shape

Your badge can have any shape, at no extra cost. The most commonly chosen shapes are
a circle, rectangle or shield; but all shapes are possible.
Even very fine shapes can be cut out with a laser cutter.

Words or a text on your badge

Of course you would like a text, a name or a year on your badge. Keep in mind the following specifications, and the text will be optimally legible.

- The letter height should be at least 2 mm.
- capitals are not necessary. However, a bold or bold font is recommended.
- Ensure sufficient colour contrast between the text and thevbackground.
  If necessary, add a lighter or darker outline around the letters.

The edge

Embroidered badges with sublimation have an embroidered border as standard. Make sure you include the border in your design or leave at least 1 mm space between the design and the edge of your badge.
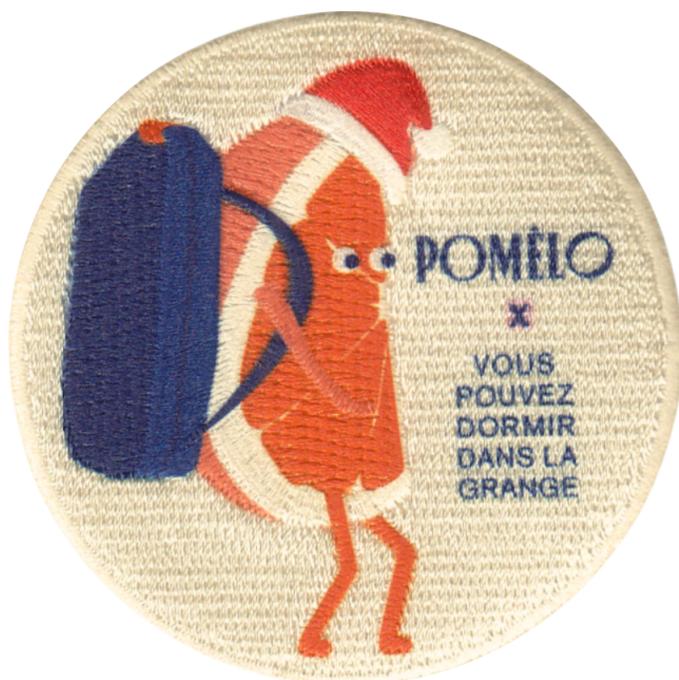

If you wish, we can also finish your badges with an overlock border, also called American or merrowed border. We recommend this border if you want to apply the badges to a cap or if you want that typical military look..

Graphic adaptations

Do you hear thunder in Cologne? Don't panic, we're here for you!

Contact our graphics team at info@ibadge.com to have your design reviewed, or ask about options to get you started.

Example

- Width 6 cm
- Sufficient colour contrast between text and background
- Minimum line thickness: 1 mm
- Minimum font height: 2 mm
- Embroidered border in the background colour
